Everyone loves trees. From the day set aside each year to celebrate them to organizations devoted to planting them, trees are valued for the many benefits they provide. How nice that California’s #1 crop grows on trees. As the almond community, we provide the world with more than just almonds; job creation, our economy, water efficiencies and more.

HEALTH ENHANCING

- An acre of almond trees grow 450 pounds of protein, 260 pounds of fiber and “good” monounsaturated fats, keeping almond lovers energized and satisfied.²³
- Produce oxygen and act as a natural filter, cleaning pollutants from the air, with measurable health benefits.
- Nationally, on average, an acre of trees is associated with $11 in annual averted health costs.⁴
- Help offset 50% of almond industry carbon emissions.⁵

BEE HIVE STRENGTHENING

- Provide honey bees with often the first natural source of food each spring.
- Honey bee hives routinely leave stronger after visiting during bloom.⁷
- Beekeepers can then split many of the hives to grow their apiaries.⁹

CALIFORNIA VALUE ADDING

- 60% of almond trees grow on soil good for groundwater recharge.⁶
- Grow three crops with every drop, the hull, the shell and the kernel—all of which are used.
- Enhance the beauty of the Central Valley.

ECONOMY BUILDING

- Add $11 billion annually to California’s economy.⁹
- Provide 104,000 jobs across California, 97,000 of which are in the Central Valley.⁹
- Are part of the fabric of their local communities, supporting local schools, businesses, and civic and religious organizations.
