

Job Description

Ag Regulatory Subcommittee (ARSC)

Subcommittee Mission: Monitor and develop policies and programs that respond to regulatory and technical issues affecting almond growing, hulling and shelling

Member/Alternate Responsibilities:

- Two all day in-person meetings per fiscal year, bi-monthly conference calls, and periodic review of materials, proposals, and budgets
- Prioritize grower and certain regulatory issues for ABC attention and response
- Monitor opportunities in conservation, crop insurance, research, and other related programs
- Policy and regulatory program development related to sustainable production
- Report to Technical Regulatory Affairs Committee (TRAC) and take direction from it, as appropriate
- Liaise with the Strategic Ag Innovation Committee (SAIC) and working groups on priority issues, research needs, and funding priorities

Member/Alternate Target Skill Sets/ Expertise (one or more of the following):

- Farm management experience
- Knowledge of regulatory and policy issues, such as air quality, pesticides, water availability, water quality, and food safety
- Familiarity with government conservation programs, farm bill, crop insurance, etc.
- Awareness of trends in sustainability and their influence on the marketplace
- Understanding of the role research plays in improving almond production
