

# 2014 California Almond Acreage Report

## California Department of Food and Agriculture

Cooperating with the USDA, National Agricultural Statistics Service, Pacific Regional Field Office

Pacific Regional Field Office · P.O. Box 1258 · Sacramento, CA 95812 · (916) 498-5161 · (855) 270-2722 Fax · [www.nass.usda.gov/ca](http://www.nass.usda.gov/ca)

**REVISED: May 4, 2015**

*Revised page 3 list of county names, acreage numbers remained the same.*

### RESULTS

California's 2014 almond acreage is estimated at 1,020,000 acres, up 5 percent from the 2013 acreage of 970,000, according to a recent survey conducted by the National Agricultural Statistics Service. Of the total acreage for 2014, 870,000 acres were bearing and 150,000 acres were non-bearing. Preliminary bearing acreage for 2015 is estimated at 890,000 acres.

Nonpareil continued to be the leading variety, followed by Monterey, Butte, Carmel and Padre.

Kern, Fresno, Stanislaus, Merced and Madera were the leading counties. These five counties had 73 percent of the total bearing acreage.

### OBJECTIVES

The Pacific Regional Field Office of the USDA's National Agricultural Statistics Service (NASS) conducts an annual acreage survey of California almond growers. The purpose of this survey is to provide annual almond acreage with information on new plantings and removals. It is a continuation of a long series of industry funded almond acreage surveys.

This report consists of two parts:

- Estimated almond acreage -- bearing, non-bearing, and total.
- Detailed data by variety, year planted, and county -- as voluntarily reported by almond growers and maintained in the NASS data base.

With perfect information, the estimated almond acreage and the detailed data would be the same. However, differences exist for the following reasons:

- A voluntary survey of approximately 6,000 almond growers is unlikely to ever attain 100 percent completeness.
- It is difficult for USDA, NASS to detect growers that are planting almonds for the first time.

The detailed data reflects tree removals from over 30,000 acres during the past twelve months. Of this number, a significant amount of acreage was harvested in 2014 prior to being pushed out, and that acreage has already been removed from the detailed data.

### PROCEDURES

The major source of the almond detailed data was a questionnaire mailed to all almond growers included on the NASS data base. The mailing was made in early November 2014. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. Telephone and field follow-up was then undertaken. Data collection ended in April 2015.

To arrive at the estimated almond acreage, the NASS almond acreage data base was compared with pesticide application data maintained by County Agricultural Commissioners and the California Department of Pesticide Regulation.

### ACKNOWLEDGMENTS

The USDA, NASS, Pacific Regional Field Office sincerely appreciates the many farm operators, owners, and management firms providing the information. A special thanks is due the Almond Board of California for funding.
