*The county level, non-bearing acreages for 2017 are approximately 75% spatially mapped and age-verified orchards. The remaining 2017 acreages are numerically estimated and partitioned across counties according to the spatially mapped acreage and ground truthing during 2019. While bearing acreage mapping has been validated with an accuracy of 98.8%, non-bearing numerical acreage estimates should be understood to have an estimated +/-10% potential variability.

**The estimated non-bearing acreages for 2018 and 2019 are numeric estimates only, however, based on extensive ground truthing, image analysis, and other lines of evidence. While bearing acreage mapping has been validated with an accuracy of 98.8%, non-bearing numerical acreage estimates should be understood to have an estimated +/-10% potential variability.
