CHINA: “Ground Zero” of our Trade Challenges
Global Trade Issues are Complex and Varied….

In most markets, almond tariffs have not been excessive….

Technical and Sanitary/phytosanitary barriers are the real concern, and harder to address…..

“Rules-Based” and “Scientifically-Supported” do not always rule the day…..

Political tensions and economics will always play a role…..
China – Market Situation

Retaliatory Tariffs hard to overcome
- 50% on kernel/inshell U.S. almonds
- 18-20% on processed/preserved

Market Access for Hulls on “Hold”
- Audit by Chinese officials scheduled just when U.S. imposed tariffs

Technical Requirements on the Rise
- More regulatory focus on NGOs, food safety
- Border entry points under scrutiny

Reorganization of Government Ministries
- Need to assess where existing relationships are active; new ministry functions
- ABC technical training workshops on hold

Alliances are Key
- Aligned with ABC activities
- Establish links in country – many associations are tied to government
- Shows ABC commitment to local economy, trade, consumers
Chinese Almonds Market
Sacramento, California

YING CHEN
Director of Oils and Cereals Department, CFNA
China Chamber of Commerce of Foodstuffs and Native Produce (CFNA) was established in September 1988. Taking *Coordination, Guidance, Promotion, Consultation* and *Service* as its objectives, CFNA works in the following areas: It encourages a fair and orderly market. It protects the interests and lawful rights of its members and of the industry. It promotes industry development.
The membership of CFNA has exceeded 6300 companies, among which 69 are members of the executive standing committee and 161 are members of the executive committee.

Its membership, covering all parts of China, is composed of the largest and most representative companies and a large number of small and medium sized enterprises. The chamber of commerce has set up 40 chambers of commodities, all of which have a nation-wide membership.
Animal by-products & Carpet

Tea & Horticulture

Fruit & Vegetable

Meat & Aquatic Product

Cereals & Oils

Native & Forestry Products
CFNA hold **China International Tree Nuts Conference** for 7 consecutive years.

The conference welcome more than 400 participants worldwide each Year.

It will be held in **Zhuhai, China** from 6\(^{th}\) — 8\(^{th}\) August 2019.
China Current Market Situation
From 1997 to 2017 the annual food import value increased from 4.1 to 61.7 billion U. S. dollars. Along with the development of national economy and the improvement of people's living standards, China's import food value has increased by 15.2 times in the past 20 years. And the compound annual growth rate of China's import food
In past 20 years, there were big changes in the ranking of the top 10 import origin countries/regions. New Zealand increased by 18 places to the third place, while France increased by 11 places to the fifth. The total proportion of import value of top 10 origins of import food decreased from 77.2 percent to 62.1 percent. The main reason for this lies in the entry of more import food into China market from more countries and regions.

### 1997 and 2017 Ranking and proportion of the top 10 origin countries/regions of import food

The decrease in the proportion of import value from the top 10 origins is due to the increased entry of food from more countries and regions into the Chinese market.
In 2017, meat and its products, dairy, and aquatic products ranked top three in import value, respectively 9.5 billion, 9.3 billion and 8.5 billion U.S. dollars.
In 2017, the top three categories in import value are meat and its products, dairy, and aquatic products. They took up 15.4, 15.1 and 13.9 percent of the total import value respectively, while altogether accounted for 44.4 percent of the total.
In 2017, the total value of import food coming in through all China’s ports was 61.7 billion U.S. dollars. The top 10 ports for food import were Shanghai, Shenzhen, Tianjin, Qingdao, Nanjing, Dalian, Guangzhou, Huangpu, Ningbo, and Xiamen. The top three ports of import food value were Shanghai, Shenzhen and Tianjin, the value of which were 13.3 billion, 8.2 billion and 6.0 billion U.S. dollars respectively.

In 2017, aquatic products, meat and its products and coarse cereals ranked top three in import value of food from the United States, with an import value of respectively 1.3 billion, 1.2 billion, and 1 billion U.S. dollars. They respectively took up 20.3, 18.4 and 15.2 percent of the total import value of food from the United States.
In 2017, 10 categories of food imported from the United States had a positive year-on-year growth in value. Grain and its products, nuts and dairy ranked top three in growth rate among all food-import categories, and increased respectively by 86.4, 48.7 and 47.6 percent.
This data is from China Customs. It's may differ from the shipment volume including mainland China and Hong Kong.

Though there’s fluctuation in some years, the trend of Almonds import in China is increasing.

Weighted Price (shown in dark red line) indicate that in last ten years rise along with the import volume.

The weighed price changes from the range of $2299/MT (2009) to $7070/MT (2015).
This data showed the import volume and price from Mainland, China and Hong Kong, China.

China Import hit a historical high at the year of 2012 with the import volume 107,134 metric tons per year.

Source: ABC
The Shipments volume are increasing in last 3 months of the year with weighted price decline slightly.

Provision 1 to 12
- Specifies the practical duties of each member.

**Part Two**
Provision 13 to 22
- Specifies the preferential and differential treatments on developing countries during the implementation of Part One.

**Part Three**
Provision 23 to 24
- Arrangements of the institutions involved, final clause and establishment of WTO Trade Facilitation Committee.
Notice of AQSIQ on simplifying inspection and quarantine procedures and improving customs clearance efficiency

01
Besides the grading system on goods risks and company credit for imported and exported goods that needs inspection and quarantine, a conformity assessment is conducted. The assessment procedure includes sampling, inspection (quarantine), examination; evaluation, validation and assurance of conformity; registration, approval, authorization and a combination of any of the above procedures.

02
Based on the grade of goods risks and company credit, a unified field and laboratory inspection and quarantine proportion is set up (hereinafter referred to as “sampling proportion”). After the application is accepted by the exit-entry inspection and quarantine institution, a sampling inspection should be implemented on a random batch of goods by a random inspector. And the result of the inspection should go public.

03
The exit-entry inspection and quarantine follows all or part of the following procedures: application accepted, examination of documents, surveillance, field and laboratory inspection and quarantine, animal quarantine, quarantine treatment, comprehensive evaluation, certificate release and clearance, as well as filling.

04
The exit-entry inspection and quarantine institution should serve as a single window for international trade and provide e-CIQ service, promoting the dematerialization during customs clearance from accepting applications to certificate release.
An assurance of conformity provided by consigner in exit or by consignee in entry should be handed in, including commitment to abiding the law, assurance of conformity, quality and safety responsibilities, and voluntary recall measures when problems are found.

For goods identified to be unconformity or with increasingly high risks, or for consignees or inspection applicants who’s credit are under Grade C, a higher sampling ratio can be applied to the goods after risk evaluation, up to 100%.

For goods constantly proved to be at a stable quality and safety level or with reducing risks, or for consignees or inspection applicants who’s credit are over Grade A, a lower sampling ratio can be applied to the goods after risk evaluation, down to the lowest standard.

The consigners, consignees and inspection applicants should carry out its own responsibility to the quality and safety of the goods.
Chapter One

a. Initialize the customs’ risk control centers and tax collection centers. Enlarge the tax to all goods listed in all chapters in the *Customs Tariff of People’s Republic of China*, regardless their means of transportation.

Chapter Two

b. Related services at documents examination centers for integrated customs clearance shall be terminated.

Chapter Three

c. Other affairs should be carried out according to GACC Announcement No. 62 of 2016.
Opinions on expanding import and promoting balanced development of foreign trade

Basic Principles:
We should persist in deepening reform and innovation, attaching equal importance to imports and exports, overall planning and development, and mutually beneficial and win-win strategy.

Optimize import structure and promote production and consumption:
Support the import of products related to people's livelihood; actively develop trade in services; increase the import of technology and equipment conducive to the transformation and development; and increase the import of agricultural products and resources products.

Optimize the layout of the international market:
We should strengthen international cooperation in “the Belt and Road” initiative, accelerate the implementation of the strategy of free trade zones, and implement preferential arrangements for imports of goods and services from the least developed countries.

Actively promoting the role of multi-channel:
Run China International Imports Expo well; Give full play to the role of foreign capital reserve in expanding imports; innovate the mode of import trade; vigorously cultivate import promotion platform; optimize the import customs clearance process; reduce the institutional costs of import links; and speed up the improvement of domestic business environment.
Ying CHEN

Director of Oils and Cereals Department, CFNA

Robust market demands

➢ 3rd largest export market for California Almonds

➢ Increasing demands for healthy, diverse and premium foods

➢ 1/3 consumers ate more almonds in 2017 than before

Active NPDs with almonds

➢ Dramatic growth of new products with almonds launched, with over 8.3% five-year CAGR, higher than 6.4% global wide

➢ Snacking, bakery and dairy categories being the growth engine

Source: Innova China report 2018 and brands auditing Sterling and Rice Group, 2017 Almonds Global Perception Report
Objectives

Boost advocacy and trade affinity

✓ Demonstrate strong consumer needs to boost trade partners’ confidence

✓ Drive trade partners to provide consistent product name and align on product benefits

Drive growth in ingredient categories

✓ Collaborate with bakery chains, participate in exhibitions

✓ Deep-dive into Chocolate sector to formulate strategy to tap the chocolate sector
TARGET AUDIENCE
From B2B to B2B2C

Government influences
- Facilitate industry development

Trade Target
- Boost confidence, increase almond usage and innovations

Consumer Education
- Enhance almond awareness and preference
Targeted trade engagement activities

**Govt./Industry Associations**
- Strengthen strategic industry relations
- Conduct in-depth packaged co-operations
- Implement regular information and insights exchange

**Retail Brands**
- Key brand visits and on-going dialogues
- Organise brand roundtables/seminar
- Engage brands co-promotion marketing campaigns

**Traders/Importers**
- Key trader/importers visits
- Host trader summits and trainings to share market news and insights

- Regular interactions through ABC owned social channels & paid media exposure
- Engagement at yearly trade exhibitions such as CNSA exhibition, SIAL, etc.
TRADE PROGRAMS
Key engagement vehicles

Event Channels
- Trade shows
- Trade seminar

Owned Channels
- B2B WeChat & E-newsletter
- Official website
- Face to face visits

Media Channels
- Trade media
  (Online & Offline)

Open platform
- Fashion week
- Follow the Sunshine
- E-commerce campaigns
EVENT CHANNELS
The Specialized Committee for Nuts and Roasted Seeds of China National Food Industry Association (CNSA) was established in 2005. It is a national industry association, which is authorized by government to manage China’s nuts and roasted seeds industry. ABC has signed a cooperation memo with CNSA to better promote California almonds in China.
Nuts industry sector: CNSA collaboration

CNSA Annual meeting
Top brands connection

CNSA Exhibition
Mass Industry Outreach
Nuts industry sector: CFNA collaboration & trader summit

• Strengthen relationship with CFNA

• Build deeper relationship with key trade partners
Nuts industry sector: Brand roundtable

- Share resources and channels for market promotion
- Leverage global resources to inspire brands for almond application
F&B sector: SIAL China

• Build deeper trade relationships with industry partners, understand their needs and seek opportunities for further collaborations.
Bakery sector: Bakery China

- Promote California Almonds’ extensive application in European bakery
- Establish relationships with bakery professionals and seek opportunities for further bakery market promotion
MEDIA & OWNED CHANNELS
Continuous industry education and communication

**Trade Media**
- 49 core media maintenance
- 12 in-depth F2F visits
- Over 30 quality trade exposures

**Owned Channels**
- Over 23% follower growth
- 2000+ total ongoing reader reach

**Ongoing Trade Engagement**
- 5 key retail brand visits
- 4 key importer F2F meetings
- 20 brands participations in co-promotion campaigns
OPEN PLATFORMS
Build open content platform for brands collaboration

- Co-promote almonds with nuts brands
- Boost trade confidence
- Explore innovative almonds promotion tactics
Trade feedback: appreciate ABC’s efforts and pay close attention to CA’ market outlook in China

• “We care about the trade policies, shipments and market price, which are important factors when we make purchase decisions. Trade summit provided us with the latest California Almond industry news and insights, helped us a lot especially in the current trade environment.”
  ——A mid-scale almond trader

• “We are paying close attention to California Almond regulatory updates and shipment status. And we also want more information about California Almonds processors/handlers. Hope we can have closer communications with ABC in the coming future.”
  ——A large-scale almond importer

• “The stable supply of high-quality almonds is very important to us. We are worried about alternative import origins can hardly meet our demands in quantity and quality. And we are happy to have ABC with us to actively monitor the tariff issues, seek for any possible solutions and keep promoting almonds here in China.”
  ——A leading retail brand

• “It is really impressive and inspiring to see ABC’s constant and diverse investment in China. We would like to participate in these marketing campaigns and maintain close collaborations with ABC. Hope to see the end of trade war ASAP and further development of California almonds in China.”
  ——A Tier I retail brand
Moving forward

**Insights & information provider**

- Latest industry news and market insights
- Technical guidance for brands and practical information to help trade partners
- Inspirations for almond promotion tactics and NPD

**Marketing partner**

- Continue with consumer education to boost California Almond awareness
- Build open platforms for integrated co-promotions with industry partners
B2C2B integrated communications
